

Shilajit Gummies

Influencer Brief

1. Format

- **Reel:** Vertical 9:16. Instagram Reels or YouTube Shorts. 60 to 90 seconds.
- **Consumption moment:** Show the product being taken. Natural, not staged.

NEVER MENTION

Competitor brands · Testosterone · Libido · Body shaming · Pre-workout · Stamina · Performance
· Himalayan · Ancient Indian medicine

2. Persona: Tejas

Tejas

Gym-goer, working professional, family man · 34 to 45 · Tier 1 and Tier 2

He goes to the gym before work, watches what he eats, takes his supplements. At 40, he is doing everything right. But by 3 PM, after back-to-back meetings, calls, and constant travel, he is running on empty. The gym did not prepare him for the work day.

He has a job to perform, parents to look after, and kids to come home to. He cannot afford to be the tired version of himself.

NARRATIVE 1: DAILY ENERGY

JTBD	He wants sustained energy that carries through the afternoon and post-work, not just the morning session.
HookOptions	• "20s mein energy thi unlimited. Ab meeting ke beech mein hi khatam ho jaata hai." • "Ghar jaake bacchon ke saath present rehna chahta hu. Sofe pe gir nahi jaana."
Mandate	• Framing: The afternoon crash is a work day problem, not a gym problem. Show the 3 PM wall, the family he wants to show up for, the responsibilities that do not stop after 5 PM. • Product: Shilajit for steady energy without a crash. KSM-66 Ashwagandha to reduce stress and cortisol. No added sugar, no glucose spike. Sweetened with Chicory Root. • Dosage: 2 gummies a day for 3 months.
Add-on	• Resin comparison: ShilAbsorb delivers 2.5x better absorption than raw resin. • Third-party lab tested. Check your batch number on the Man Matters website.

NARRATIVE 2: ZERO ADDED SUGAR

JTBD	He takes care of what goes into his body. A gummy with no sugar and no junk means no compromise on health.
HookOptions	"Yaar gummy mein toh chini hogi? Health ka dhyan rakhta hu, sugar nahi leta mein." "Yeh choti si gummy ko dekh kar jo soch rahe ho na, vo bilkul hi galat hai. Na iss mein koi artificial preservatives hain, na chemicals."
Mandate	Framing: He raises the objection himself. Answer it immediately. No sugar, no junk, nothing he would not want in his body. Product: No added sugar. Sweetness comes from Chicory Root, a natural prebiotic fibre. No glucose spike. Shilajit + KSM-66 Ashwagandha + Black Musli + Black Pepper. No chemicals, no preservatives, no artificial flavours. 100% vegetarian, no animal-based substances. Dosage: 2 gummies a day for 3 months.
Add-on	Third-party lab tested. Purity, heavy metals, fulvic acid percentage.

NARRATIVE 3: PRODUCT FIRST

RESIN VS GUMMY

JTBD	He sees the gummy as the only format that actually fits his life. Modern, travel-ready, zero friction.
HookOptions	"Resin? Roz subah garam paani, chamach, mix mix? Meri life mein yeh nahi hota." "Travel pe hu, gym bag mein hai, office mein hu. Har jagah ho sakta hai."
Mandate	Framing: Hectic life, modern format. Resin needs prep every morning. The gummy needs nothing. Product: 300 mg standardised Shilajit per gummy. Shilajit, KSM-66 Ashwagandha, Black Musli, Black Pepper. Third-party lab tested, every batch. Dosage: 2 gummies a day for 3 months.
Add-on	No added sugar. Naturally sweetened, no glucose spike.

SAFETY (THIRD-PARTY LAB TESTED)

JTBD	He feels confident about what he is putting in his body because the testing is independent, verifiable, and not just a claim on the pack.
HookOptions	"Ek seedha advice: koi bhi supplement mat lo jo clinically tested na ho. Har batch independently check hona chahiye." "No acidity, no sleep issues, kuch bhi nahi. Factory se batch tak, sab transparent hai."
Mandate	Framing: Someone giving a genuine recommendation, not a sales pitch. Factory visit or manufacturing process video works well here. Clean, transparent, no side effects. Product: Every batch tested independently: purity, heavy metals, aflatoxins, fulvic acid. No acidity, no sleep disruption. Batch report on Man Matters website. Dosage: 2 gummies a day for 3 months.
Add-on	Clinical study: 90-day placebo-controlled trial, 120 gym-goers. 25% Fitness Score improvement, 23% cortisol reduction. Published in peer-reviewed journals.

3. Persona: Aakash

Aakash

Non-gym buyer, desk-based professional · 30 to 42 · Tier 1 and Tier 2

He has a desk job, sits for 8 to 10 hours, eats a heavy lunch, and drinks two or three teas a day. In his head, he is doing fine. He eats fruit, walks sometimes. He thinks the 3 PM crash is just how life is.

He is not looking for a transformation. He just wants to get through the afternoon without feeling like he needs to sleep at his desk.

NARRATIVE 1: PURE & NATURAL/ INGREDIENTS

JTBD	Too many supplements in the market. This one is easy to add to his routine because it is built from natural substances he actually recognises.
HookOptions	"Gym nahi jata, but kuch toh karna chahiye tha. Natural ingredients, simple routine. Yeh easy tha." "Koi chemicals nahi, koi preservatives nahi. Jo andar hai, woh samajh aata hai."
Mandate	Framing: Natural, familiar, simple. Not a gym product. Ingredient-based visuals work well here. Factory video showing ingredients adds trust. Product: Shilajit and KSM-66 Ashwagandha. Natural ingredients, no chemicals, no preservatives, no artificial flavours. 100% vegetarian. Dosage: 2 gummies a day for 3 months.
Add-on	- No added sugar. Sweetened with Chicory Root, a natural prebiotic. - Third-party lab tested. Every batch certified for purity.

NARRATIVE 2: DAILY ENERGY

JTBD	He understands that the heavy lunch, the sugar spike, and the chai loop are the actual reason behind the 3 PM crash. This breaks that cycle.
HookOptions	"Lunch ke baad chai peeta tha roz. Ab woh zaroorat hi nahi rehti." "Dimag bhi band ho jaata hai 3 baje. Wohi problem thi, wohi solve hua."
Mandate	Framing: Heavy meals cause a sugar spike and then a crash. Tea is the temporary fix that makes it worse. One gummy after lunch replaces the chai and breaks the cycle. Product: Shilajit + KSM-66 Ashwagandha. No added sugar, no glucose spike. Replace the post-lunch chai with one gummy. Dosage: 2 gummies a day for 3 months.
Add-on	- ShilAbsorb: 2.5x better absorption than raw resin. - Third-party lab tested. Every batch certified.

4. Persona: Fitness Buyer

Fitness Buyer

Daily gym-goer or athlete · 24 to 35 · Supplement-literate

Runs a full stack: whey, creatine, pre-workout. Reads labels, questions claims. He is not looking to be sold to. He wants that extra push in the gym, that extra rep, that extra lap. He feels Shilajit can get him there.

His goal: more energy in the gym, especially in the afternoon session when the body starts to dip.

NARRATIVE 1: PURE & NATURAL/ INGREDIENTS

JTBD	He sees this as a serious, well-formulated product that gives him a measurable edge without cluttering his stack.
HookOptions	"Pehle mein bhi afternoon mein thak jaata tha. Ek extra lap push karne ka strength hi nahi aata tha." "Mere stack mein protein tha, creatine tha. Jo nahi tha woh tha cellular energy support. Shilajit woh karta hai jo baaki supplements nahi karte."
Mandate	Framing: Built for runners, calisthenics athletes, gym-goers who want more from the same session. Each ingredient has a specific job. Product: Shilajit: steady energy, cellular support. KSM-66 Ashwagandha: reduces cortisol, better recovery. Black Musli: supports endurance. Black Pepper: enhances absorption of all ingredients. No added sugar. 100% clean label. Dosage: 2 gummies a day for 3 months.
Add-on	Third-party lab tested. Clinically tested.

NARRATIVE 2: PRODUCT FIRST

CLINICAL STUDIES

JTBD	He sees Man Matters as a brand that has actually done the science, not just claimed it.
HookOptions	"90-day study. 120 gym-goers. Placebo group. Blood tests for cortisol. VO2 max measured. Published." "25% Fitness Score improvement. 23% cortisol reduction. Peer-reviewed journals. Check the link."
Mandate	Framing: Give him the full proof structure. He will look it up. Do not say clinically proven without citing the study. Product: 90-day placebo-controlled trial, 120 gym-goers. 25% Fitness Score improvement, 23% cortisol reduction. Published in peer-reviewed journals. Batch report on Man Matters website. Dosage: 2 gummies a day for 3 months.
Add-on	Third-party lab tested. Every batch independently certified.

RESIN VS GUMMY

JTBD	He finds resin bitter, messy, and easy to skip. The gummy keeps the habit consistent without breaking his routine.
HookOptions	"Resin try kiya tha. Bitter tha, messy tha. Consistency nahi rahi." "Gummy. Gym bag mein. Done. Koi excuse nahi."
Mandate	Framing: Resin is the product that promises a lot and gets abandoned. Bitterness and mess break consistency. The gummy removes both barriers. Product: 300 mg standardised Shilajit per gummy. ShilAbsorb: 2.5x better absorption than raw resin. No bitter taste, no prep. Third-party lab tested, every batch. Dosage: 2 gummies a day for 3 months.
Add-on	No added sugar. 100% clean label.

SEASON BASED NARRATIVE

Summer

Seasonal layer · April to June · Any profile · Expert-led content only

Not a separate demographic. A seasonal objection layer on top of Tejas or Aakash. Heating, liver heat, and sugar sensitivity surface in North and West data every summer.

NARRATIVE 1: SUMMER BASED

JTBD	He drops the biggest objection blocking summer purchases and feels confident continuing the habit through peak heat.
HookOptions	"Summer mein Shilajit? Yeh myth hai. Sunlo kyun." "Garam nahi karta. Chicory Root hai isme. GI of 2. Gut coolant hai, heater nahi."
Mandate	Framing: Open with the fear, bust it immediately. Expert voice only. Name the ingredient, explain the mechanism. Do not generalise. Product: Chicory Root: natural prebiotic, GI of 2, acts as a gut coolant. No added sugar, no glucose spike. Safe for summer, safe for 40+ buyers with diabetes concerns. Dosage: 2 gummies a day for 3 months.
Add-on	- Third-party lab tested. Every batch certified for purity and heavy metals. - No acidity. No heat-related side effects.

JTBD	He sees the gummy as the only Shilajit format that makes practical sense in summer. No warm water, no mess, no excuses.
HookOptions	"Resin ke liye garam paani chahiye. 42 degree mein? Nahi hoga." "Gummy. Bag mein. Anywhere. Summer ka sabse easy supplement."
Mandate	Framing: Resin in summer is a dead habit. Warm water prep at 40 degrees is not realistic. The gummy removes every barrier.

	• Product: No prep, no warm water, no mess. Chicory Root keeps it cooling. No added sugar. 300 mg standardised Shilajit per gummy. • Dosage: 2 gummies a day for 3 months.
Add-on	• Third-party lab tested. Every batch certified. • No acidity. No heat aggravation.
